

# Animal Vaccination- A boost to local livelihood

POWERING A GREENER TOMORROW

## Goals:

- Vaccinating animals and poultry, to increase productivity and enhance the incomes of the rural population
- Training local women to undertake this activity, and making them self reliant.

**State** : Daman (U.T.)

**Location** : Daman

**Brief of the activity** : In India a large number rural population depends on animal husbandry for its daily livelihood. Dependence on poultry and other animals is extremely high in Daman. Suzlon Foundation through its Animal Vaccination initiative helps the community to enhance the produce of the animals, thereby generating more income. The project has been warmly welcomed by the villagers and locals have also been trained for these activities.

**Progress** : Over 7, 000 poultry and 400 animals have been vaccinated in the region through this project.

**Benefits** : The initiative has increased the productivity of the animals and poultry manifold, thereby increasing the income generation capacity of the villagers

**Quick Information** : Ongoing

**Partners** : Nehru Yuva Kendra and Animal Husbandry Dept. of Daman
