

Suzlon Foundation Completes a Year in 2008

Suzlon Foundation completes its first year on 27th December '08. It has been a year characterised by immense energy, dynamic action and a ground surge of support – from both within the Suzlon Group, our partners and associates, and the communities that we have sought to work with.

Today, through more than 100 development initiatives, Suzlon Foundation is reaching out to over 400 villages, in 8 states and 2 union territories of India. Across its spread the Foundation is empowering more than 500 community based organisations and over 100 educational institutions. Through our Soil and Water Conservation initiative, the foundation has been able to change the face of over 1,000 hectares of land and harvest 30,00,000 cubic meters of rainwater. In addition to this we have also vaccinated more 25,000 animals and generated wages worth Rs. 10 million in rural areas. All this and much more, has only been possible with the support of our partners and their strong belief towards our programs.

“One Mission, a million hands at work - Sustainable Development”
